I, Steve Carpenter, submit this Reply Expert Report pursuant to Federal Rule of Civil Procedure 26 in response to the Rebuttal Expert Report of Philip D. Dregger Concerning U.S. Patent 6,357,193 B1 ("the '193 Patent") submitted by Defendant Battens Plus, Inc. regarding infringement of the '193 Patent.

I. INFORMATION AND MATERIALS CONSIDERED

For purposes of my opinion I have considered the information and materials listed in Appendix A, and fully incorporate into this report the information considered and provided in my initial January 16, 2006 report, Expert Report of Steve Carpenter on Infringement.

II. STATEMENT OF OPINIONS

I offer the following reply opinion regarding Battens Plus' infringement of the '193 Patent after reviewing the Rebuttal Expert Report of Philip D. Dregger Concerning U.S. Patent 6,357,193 B1 ("Mr. Dregger's Rebuttal Report"). My opinions are partly based upon

instructions provided by Diversi-Plast's attorneys and information provided and discussed in my initial report on infringement, which is incorporated by reference into this report. I reserve the right to supplement my opinions and analysis upon the issuance by the Court of an order construing the asserted claims of the '193 Patent as well as any further developments in the reissue/reexam prosecution of the '193 Patent.

Based upon instructions provided by Diversi-Plast's attorneys, my close review of the '193 Patent in light of my practical understanding and experience with roof battens and tile roofing systems, and Mr. Dregger's Rebuttal Report, it is still my opinion that Battens Plus infringes claim 2 of '193 Patent and that Mr. Dregger's Rebuttal Report does not demonstrate that claim 2 of the '193 Patent is indefinite or lacks understanding to someone with practical knowledge and experience with tile roofing systems.

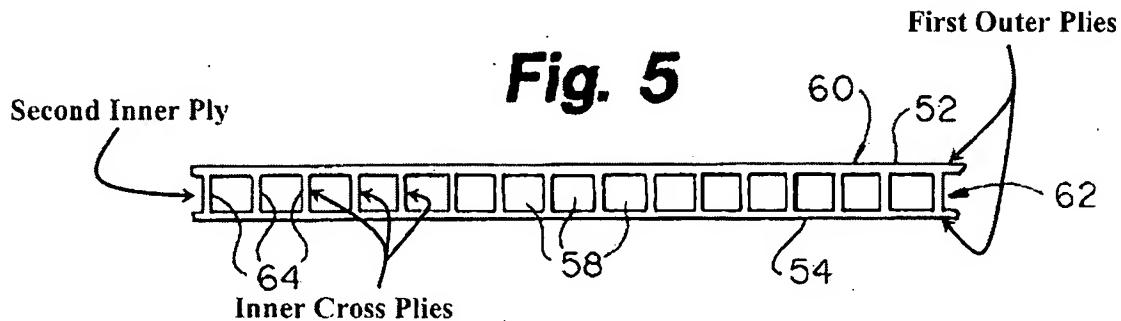

Indefiniteness

In addition to the previous instructions provided by Diversi-Plast's attorneys, I have been instructed that indefiniteness relates to validity of a patent claim and does not involve infringement. Therefore, Mr. Dregger's conclusions on indefiniteness in his Rebuttal Report do not address infringement. However, the clear meaning of the terms in the '193 Patent are discussed in detail below.

Claim Construction

Mr. Dregger's Rebuttal Report states that the terms "ply," "plies," "cross-plies," "second ply," and "first plies" are not defined by the '193 Patent. However, as I stated in my report regarding infringement, all of the language used in claim 2 is understandable after reading the '193 Patent and none of the claim language requires any special understanding or meaning. For instance, Figure 5 (shown below) and Column 3, Lines 18-24 of the '193 Patent clearly define

the various plies as distinct sections of the batten.

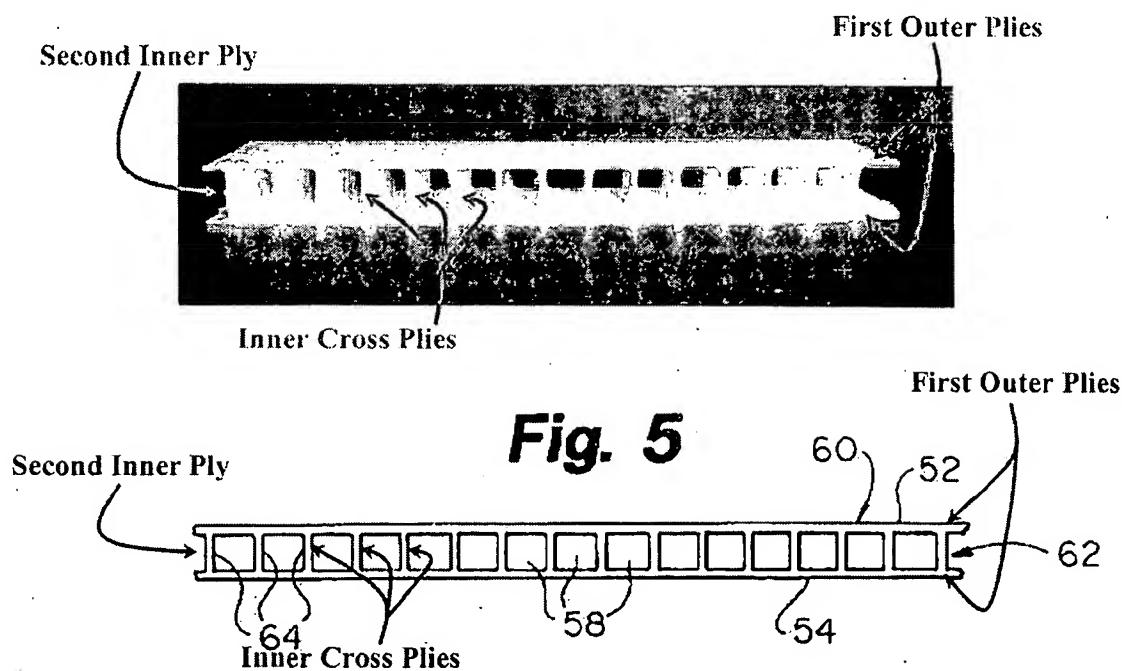

Mr. Dregger's Rebuttal Report also makes the confusing argument that the terms "ply," "plies," "cross-plies," "second ply," and "first plies" have a special meaning. It is unclear how a patent could not define a term on one hand, and then provide a special meaning for a term on the other hand, as argued by Mr. Dregger. As I have stated, these terms are very clearly defined and shown in the '193 Patent and do not require any special meaning or understanding. To the extent Mr. Dregger is attempting to make an invalidity argument, my opinions on the validity of the '193 Patent were provided in my Rebuttal Report Regarding the Validity of U.S. Patent No. 6,357,193, demonstrating that the terms of claim 2 are clear and claim 2 is valid.

Reading Claim 2 on the BattenUp Tile Batten

Mr. Dregger's Rebuttal Report also mistakenly states that someone having ordinary skill in the art would interpret claim 2 of the '193 Patent to exclude extruded products. The figures of the '193 Patent, such as Figure 5 (shown above), in combination with Column 3, Lines 34-51 of the '193 Patent clearly indicate that the '193 Patent covers plastic materials, including polyethylene resins, and could be formed by known processes, such as extrusion. Extrusion and other processes of making plastic battens could be used to make a batten having the structure of claim 2, such as the claimed plies, as demonstrated by the infringing BattenUp product.

Mr. Dregger also incorrectly states that the BattenUp product does not contain the "second ply" or "first ply" elements of claim 2. However, comparing the batten elements of claim 2 as disclosed in Figure 5 and Column 3, Lines 18-24 with the BattenUp product (see below) clearly proves that the BattenUp product contains all of the batten elements, including the distinct "second ply" and "first ply" elements of claim 2.

Other Elements of Claim 2

As I stated in my earlier report on infringement, it is also my opinion that the BattenUp tile batten roof system includes the other elements of claim 2 of the '193 Patent. The BattenUp tile batten roof system sold and advertised by Battens Plus includes a plastic tile batten made to lay over roofing material, such as felt, and under the tile to support the tile. Mr. Dregger's Rebuttal Report does not address these elements of claim 2, so I assume he does not dispute my conclusions.

III. CONCLUSION

Based on the reasoning provided in section II of this report, it is still my opinion that Battens Plus infringes claim 2 of the '193 Patent with its BattenUp tile batten system, both directly and through induced and contributory infringement. The BattenUp tile batten system includes each and every element of claim 2.

IV. EXHIBITS

I may use exhibits at trial or other hearings including (1) portions of the '193 patent, (2) portions of any initial, rebuttal, or reply report of Diversi-Plast or Battens Plus, (3) portions of the materials identified in the text and appendices of any initial, rebuttal, or reply report of Diversi-Plast or Battens Plus, (4) sample batten products, and (5) exhibits as an aid to the Court in presenting my opinion.

In preparing this report I relied on the information and materials currently available to me. I reserve the right to continue my investigation and to supplement or modify my opinion based on documents and information that has not yet been produced or is not yet available, and based on any relevant information from or actions taken during the reexam/reissue proceeding for the '193 Patent currently pending with the U.S. Patent Office. I understand that I may be asked to give further opinions in response to any future opinions expressed by Defendant's experts.

Respectfully submitted,

By:
